SUMMARY

A dedicated and goal-oriented operations professional specializing in the automotive industry, with domestic experience in automated manufacturing, process improvements, supplier relations, production management, staff training/development, SAP inventory and delivery, and value-added processes. A proven track record of enacting processes to cut costs, cultivate savings, improve productivity, and maintain organizational excellence. Excels at continually examining operations to mitigate risks, foster staff alignment, and drive long-term output. A savvy and resourceful leader, who maximizes operations to exceed key targets continually for growth and prosperity.

EXPERIENCE

TSCS, LLC, Beaver Dam, Wisconsin
Jr. Consultant, February 2021 – Current

Work aside owner, consulting manufacturing facilities about process improvements, policy improvements, inventory management, and IT/Web solutions. I gather data, then analyze the gathered data using Minitab, Excel, Google Analytics, and much more. We then find improvements that will be cost effective, safe, reliable, and everlasting. I set controls within the process improvements implemented to ensure its success, results, and longevity.

I have created four websites, using WordPress, and custom HTML, CSS, and JavaScript code.

Saputo, Alto, Wisconsin
Computer Operator/Line Lead, March 2020 – July 2021

Work with Supervisor and Sub Supervisor to help ensure quality product is being made on time for shipment or on time for a secondary process. I use SAP daily to move product through each process in the mozzarella packaging department. I also ensure all quality policies are completed as stated. This requires me to perform metal checks as stated in the quality policy. I also pull needed physical cheese samples as required per the quality policy. I help to lead the line with what product is being packaged, requiring various forms of packaging/packing methods.

BURGESS-NORTON MANUFACTURING, Beaver Dam, Wisconsin
Team Leader/Supervisor, 2016 - 2019

Assumed role of Beaver Dam production manager in addition to role as Team Leader. Addressed variety of management and operational issues. Oversaw maintenance, quality, and production employees on assigned shift. Assumed accountability for sales, profit, inventory, safety, headcount, and training. Assisted new part launch, best practice sharing, standardization, capital purchases, productivity, scrap, training, and recruitment. Traveled between plants for innovation fairs and to assist transfer of new part launches.

- Directed a Six-sigma project, improving our tracking/usage of inserts used in the CNC department. Now utilizing 90% of inserts and saving \$25,000 annually.
- As shift supervisor, helped achieve 109.4% of planned profitability in 2017 and 116.7% of planned profitability in 2018.
- Led/trained employees to achieve a zero-incident fiscal year.
- Reduced scrap rates once at 8.7% to 2.5%. Now being considered world class.

- Led shop floor to zero incidents while being audited. In return achieved the first year of transferring to IATF-16949 quality management system.

BURGESS-NORTON MANUFACTURING, Beaver Dam, Wisconsin
Computer Numerical Control Technician, 2014-2016

Worked on all three shifts, helping to train and achieve machining excellence. Assumed primary accountabilities for all finished products being used in the CNC department. Led the CNC department to zero incidents while being audited for TS-16949.

- Took part in putting together new containment policy in the CNC department, helping to ensure PPM stays at an all-time low.
- Reduced scrap by 2% amidst the CNC department.
- Earned excellent reviews for quality and safety.
- Completed all inspections ensuring quality product was to be machined on each piece of equipment.

Burgess Norton, Beaver Dam, Wisconsin
Sinter Operator, 2013-2014

Improved furnace efficiency to 94.6%. Trained new operators on safe practices, providing zero incidents in the sintering department for FY 2013-2014.

- Ensured plant training remained in alignment with corporate guidelines.
- Cultivated strong focus on keeping furnaces full of product to increase efficiency among all shifts
